Profile

Master 2 student in Information Systems and Data focused on Data Engineering, cloud architectures and data quality. I build practical, documented projects with Python, SQL, TypeScript and data tools, and am seeking an international junior opportunity or apprenticeship.

Education

USTO-MB, University of Science and Technology of Oran Mohamed Boudiaf Oran, Algeria
Master 2, Information Systems and Data 2026 — Present

- Ranked 1st out of 122 students in Master 1; selected coursework: Algorithms, IS Analysis, Industrial Optimisation and Cloud Computing.

USTO-MB, University of Science and Technology of Oran Mohamed Boudiaf Oran, Algeria
Licence, Information Systems and Software Engineering 2022 — 2025

- Ranked 4th out of 184 students in the licence cohort; final-year project: TripDzAir tourism platform (17.5/20).

Selected Projects

Data Quality Observatory (github.com/ibrahimyebdri/data-quality-observatory) 2026

- Browser-based CSV profiling workspace with deterministic completeness, uniqueness, validity and date-quality checks.
- Built with TypeScript; produces an explainable score, findings, local run history and JSON export.

ETL Global Banks Pipeline (github.com/ibrahimyebdri/etl-global-banks-pipeline) 2026

- Python ETL project for extracting, transforming and loading banking data into CSV and SQLite outputs.
- Uses selected fields, annual-volume transformations and structured CSV/JSON-style processing steps.

Ticleio — School Management Project (github.com/ibrahimyebdri/ticleio) 2026

- Academic information-system project applying Python and SQL to structured school-management workflows.

TripDzAir (github.com/ibrahimyebdri/PFEL3) 2025

- Final-year tourism platform with client and administration spaces, built with Next.js, PostgreSQL and Supabase.

Certifications and Languages

- Certifications:** Databricks Data Practitioner; Databricks Database Administrator; Databricks Database Developer; AWS Academy Graduate — Cloud Foundations; IBM via Coursera learning in RDBMS, SQL, Python and Data Engineering.
- Languages:** Arabic native; French DELF B2; English B2.

Technical Skills

- Data and backend:** Python, Java, SQL, PySpark, Pandas, NumPy, Jupyter, PostgreSQL, Oracle Database and SQLite.
- Cloud and tooling:** AWS S3, RDS, Auto Scaling, IAM, Git, GitHub Actions, Linux and reproducible project structure.
- Web and applications:** TypeScript, JavaScript, React, Next.js, Tailwind CSS, React Native, Expo, Firebase and Supabase.
- Systems foundations:** C, Java, sockets, distributed algorithms, simulation labs and academic software engineering.

Engagement

- AIESEC Oran: Customer Experience Manager and Global Volunteer support (2025); SDG delegate (2024).
- GDG on Campus USTO-MB: core-team member and technical-event contributor; event organisation and Arduino innovation activities.
